1、Git+下载

(1) 访问Git官方下载网站: git-scm.com/downloads

选择与电脑操作系统相对应的版本进行下载。

网盘直接下载: pan.quark.cn/s/e8bd43ce...

2、Git 安装（windows版）

(1) 启动安装程序

👍 赞同 17 🗨 添加评论 🔄 分享 ❤️ 喜欢 ⭐ 收藏 📄 申请转载 ...

双击下载的.exe文件，出现用户账户控制提示时点击「是」

(2) 阅读许可协议

看完许可声明，点击【Next】

(3) 选择安装路径

默认安装路径为 C:\Program Files\Git\，点击【Browse】可以进行修改，我这里保持默认，点击【Next】

(4) 选择组件

勾选 “On the Desktop” 将 Git 添加在桌面上，其他默认勾选的建议不要取消，否则可能造成某些功能不完整。点击【Next】

(5) 选择开始菜单文件夹

如果不需要在开始菜单中添加 Git，勾选 “Don't create a Start Menu folder”，要选择其他文件夹点击【Browse】可以自行修改。这里继续点击【Next】。

To continue, click Next. If you would like to select a different folder, click Browse.

Git

Browse...

☐ Don't create a Start Menu folder

(6) 选择默认编辑器

Git的默认编辑器为Vim⁺，如果不熟悉Vim的使用可以选择现代的GUI编辑器，如Notepad++⁺等，无需修改点击【Next】进行下一步。

Git 2.47.1 Setup

Choosing the default editor used by Git

Which editor would you like Git to use?

Use Vim (the ubiquitous text editor) as Git's default editor

The [Vim editor](#), while powerful, [can be hard to use](#). Its user interface is unintuitive and its key bindings are awkward.

Note: Vim is the default editor of Git for Windows only for historical reasons, and it is highly recommended to switch to a modern GUI editor instead.

Note: This will leave the 'core.editor' option unset, which will make Git fall back to the 'EDITOR' environment variable. The default editor is Vim - but you may set it to some other editor of your choice.

(7) 选择仓库的初始分支

默认创建存储库的初始分支为master，如果需要修改的话，就勾选第二个“Override the default branch name for new repositories”，并在main处修改为想要的分支名。点击【Next】

Git 2.47.1 Setup

Adjusting the name of the initial branch in new repositories

What would you like Git to name the initial branch after "git init"?

☒ Let Git decide

Let Git use its default branch name (currently: "master") for the initial branch in newly created repositories. The Git project [intends](#) to change this default to a more inclusive name in the near future.

☐ Override the default branch name for new repositories

NEW! Many teams already renamed their default branches; common choices are "main", "trunk" and "development". Specify the name "git init" should use for the initial branch:

main

This setting does not affect existing repositories.

(8) PATH环境配置

选择第二项「Git from the command line and also from 3rd-party software」，通过命令行及第三方工具使用Git，默认这个配置也是被推荐的。

Git 2.47.1 Setup

Adjusting your PATH environment

How would you like to use Git from the command line?

☐ Use Git from Git Bash only

This is the most cautious choice as your PATH will not be modified at all. You will only be able to use the Git command line tools from Git Bash.

☒ Git from the command line and also from 3rd-party software

(Recommended) This option adds only some minimal Git wrappers to your PATH to avoid cluttering your environment with optional Unix tools. You will be able to use Git from Git Bash, the Command Prompt and the Windows PowerShell as well as any third-party software looking for Git in PATH.

☐ Use Git and optional Unix tools from the Command Prompt

Both Git and the optional Unix tools will be added to your PATH.

Warning: This will override Windows tools like "find" and "sort". Only use this option if you understand the implications.

[Back](#)[Next](#)[Cancel](#)

(9) 选择 SSH 可执行文件

选择 “Use bundled OpenSSH+” ， 点击【Next】

(10) 选择 HTTPS 传输库

保持默认选择 “Use the OpenSSL library” ， 点击【Next】

(11) 配置行尾转换

保持默认选择 “Checkout Windows-style, commit Unix-style line endings” （默认推荐）， 点击【Next】

(12) 配置终端模拟器

保持默认选择 “Use MinTTY+” ， 点击【Next】

window, no-rectangular selections and a Unicode font. Windows console programs (such as interactive Python) must be launched via `winpty` to work in MinTTY.

☐ Use Windows' default console window

Git will use the default console window of Windows ("cmd.exe"), which works well with Win32 console programs such as interactive Python or node.js, but has a very limited default scroll-back, needs to be configured to use a Unicode font in order to display non-ASCII characters correctly, and prior to Windows 10 its window was not freely resizable and it only allowed rectangular text selections.

(13) 创建 git pull 的默认行为

添加评论

分享

喜欢

收藏

申请转载

...

保持默认选择 "Fast-forward or merge"，Git 会尝试使用快进操作将当前分支更新到已拉取分支的最新状态。如果无法进行快进操作，例如存在冲突，Git 将创建一个合并提交。

Git 2.47.1 Setup

Choose the default behavior of `git pull`

What should `git pull` do by default?

☒ Fast-forward or merge

Fast-forward the current branch to the fetched branch when possible, otherwise create a merge commit.

☐ Rebase

Rebase the current branch onto the fetched branch. If there are no local commits to rebase, this is equivalent to a fast-forward.

☐ Only ever fast-forward

Fast-forward to the fetched branch. Fail if that is not possible. This is the standard behavior of `git pull`.

...

选择 "Git Credential Manager"，自动处理身份验证并避免频繁输入凭据，点击【Next】

Git 2.47.1 Setup

Choose a credential helper

Which credential helper should be configured?

☒ Git Credential Manager

Use the [cross-platform Git Credential Manager](#). See more information about the future of Git Credential Manager [here](#).

☐ None

Do not use a credential helper.

...

选择默认即可，点击【Install】进行安装。

Git 2.47.1 Setup

Configuring extra options

Which features would you like to enable?

☒ Enable file system caching

File system data will be read in bulk and cached in memory for certain operations ("core.fscache" is set to "true"). This provides a significant performance boost.

☐ Enable symbolic links

Enable [symbolic links](#) (requires the SeCreateSymbolicLink permission). Please note that existing repositories are unaffected by this setting.

Install

Cancel

(16) 等待安装完成

(17) 完成安装

点击【finish】安装完成，第二个是查看 Git 发行的，可以取消勾选，不取消勾选会在浏览器跳转

跳转到浏览器页面，如下图：

如上，搞定Git安装！！！！
